PROJECTS

E-Medical Website (Doctor - Patient)

Developed with HTML, CSS, PHP, and MySQL
Platform for searching doctors by name, city, and specialization
Includes real-time doctor-patient communication and a secure login system
Simple and functional user panel for efficient management

Link https://github.com/RinesaJ/E-Mjeku

User Management App

Application for user management with CRUD functionalities, including listing users from an API, searching by name or email, displaying user details (address, phone, website), adding users with form validation, sorting, as well as updating and deleting them.
